

Installation Instructions For LED Panels

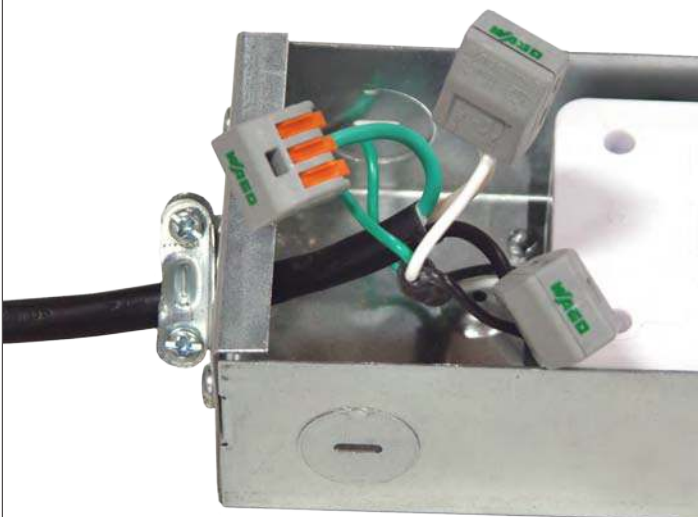

Wiring for LED Panel

Remove cover to access dimmer wiring panel.

1) Remove two (2) screws holding access plate and install appropriate strain relief for your installation through knockouts.

2) With power off at the breaker, feed power leads through strain relief and cover plate and secure. Connect power leads to driver according to wiring diagram.

3) Reinstall cover plate on the driver housing and secure in place with two (2) screws. Secure the product to ceiling T-bars and attach to the ceiling with aircraft cable or wires capable of supporting 100 lbs. for hanging mount.
